

LETTER TO OUR PATIENTS

COVID-19

There is no higher priority for us than the safety of our patients and employees. Every day, our staff and other medical offices are struggling with what to do today. We want you to feel confident when visiting our office, so we have enhanced some of the procedures, based on recommendations from the Department of Health and the CDC, for our patients' health and protection.

Effective March 16, 2020, we are calling all of our patients one day prior to their appointment and screening them over the phone to see if they are experiencing fever of 100.4 or higher, cough and difficulty breathing. If the answer is yes to any one of the three symptoms, they will be rescheduled to May or later. In addition, we are asking the same question to every patient that checks into the office. We also will be taking a temperature on patients with their vitals. Any patient that has a fever of 100.4 or higher will be asked to reschedule their appointment.

We are doing everything possible to protect the patients and the staff. We appreciate your understanding with the policies set forth. We are monitoring this developing situation closely, staying in regular contact with our health organizations, and other experts while always keeping patient care at the forefront. This information is evolving each day. It is important to stay informed, wash hands frequently and keep to 6 foot distancing.

Stay well and thank you for your understanding,

Mondragon McGrinder Stier, OB-GYN Associates PLLC
